

Alec Helbling

Visualization and Machine Learning

I develop novel interfaces for controlling Generative AI. In particular, I leverage a combination of machine learning and interactive visualization to allow humans to control generative models.

I have worked with researchers and engineers at Georgia Tech, IBM Research, NASA Jet Propulsion Laboratory, Microsoft, and the University of Pittsburgh.

🎓 Google Scholar

Education

Aug. 2023 - Present

Ph.D. in Machine Learning

Georgia Institute of Technology, Atlanta, GA

Advisor: Duen Horng (Polo) Chau, Co-advisor: None

🏆 **President's Fellowship**

Aug. 2018 - Dec.
2022

B.S. in Computer Science

Georgia Institute of Technology, Atlanta, GA

Overall GPA: 3.91/4.00, Highest Honors, Threads in Intelligence and Theory

Industry Research Experience

Summer 2021, 2022

IBM Research, Yorktown Heights, NY

AI Research Intern, Foundations of AI Reasoning Group

Mentor: Achille Fokoue, Tengfei Ma, Maria Chang

I worked on systems for summarizing natural language documents in a way that preserves their factuality.

Summer 2020

Microsoft, Redmond, WA

Software Engineering Intern, Microsoft Intune Insights and Analytics Group

Mentor: Durga Kumar Varanasi

Developed a system for automatically distributing service traffic across several database instances.

Summer 2019

NASA Jet Propulsion Lab, Pasadena, CA

Machine Learning Research Intern, Machine Learning and Instrument Autonomy Group

Mentor: Lukas Mandrake, Jack Lightholder

I worked on interactive interfaces allowing mission scientists without ML expertise to deploy powerful ML methods.

Academic Research Experience

Present —

Georgia Institute of Technology, Atlanta, GA

Graduate Research Assistant, School of Computational Science and Engineering

Advisor: Duen Horng (Polo) Chau

I am a member of the Polo Club of Data Science. We focus on the intersection of machine learning, human computer interaction, and visualization.

Fall 2020–Spring
2023

Georgia Institute of Technology, Atlanta, GA

Student Researcher, SIPLab

Mentor: Chris Rozell, Kion Fallah, Matthew O'Shaughnessy

I worked on systems for controlling deep generative models for image generation by using simple pairwise feedback from people.

Mar. 2015 – Aug.
2018

University of Pittsburgh, School of Medicine, Pittsburgh, PA

Student Researcher and Javascript Programmer, Koes Lab

Mentor: David Koes

I worked on methods for visualizing molecular structures in web browsers, applications of machine learning to computational drug discovery, and visualizations of machine learning models for drug discovery.

Honors and Awards

2023

Best Poster, IEEE VIS 2023

For "Manim ML: Communicating Machine Learning Architectures with Animation"

2023 — Present

President's Fellowship at Georgia Institute of Technology

Select number of 1st year doctoral students who bring exemplary levels of scholarship and innovation to their academic departments

2020, 2021

President's Undergraduate Research Fellowship (x2)

For "PrefGenML: Preference Guided Image Generation with Relative Attributes"

2018

Pittsburgh Science and Technology Academy Valedictorian

Top of my high school class

Publications

ManimML: Communicating Machine Learning Architectures with Animation

Alec Helbling, Duen Horng (Polo) Chau

IEEE VIS: Visualization Conference (IEEE VIS). Melbourne, Australia, 2023.

Oracle Guided Image Synthesis with Relative Queries

Alec Helbling, Christopher John Rozell, Matthew O'Shaughnessy, Kion Fallah

ICLR Workshop on Deep Generative Models for Highly Structured Data (ICLR DGMHSD). 2022.

[Project](#) [PDF](#) [BibTeX](#)

Mentoring

Fall 2023

Evan Montoya at Georgia Tech

BS in Computer Science, Georgia Institute of Technology

Methods for enabling compositionality of text-to-image generation systems.

Grants and Funding

2021

Controlling Deep Generative Models with Pairwise Comparisons

President's Undergraduate Research Fellowship

Co-PIs: Chris Rozell

Funded \$1500/semester for 2 semesters
